

ElevenLabs Agent Integration

You can make a SIP call to a AI chatbot created in ElevenLabs through TekSIP. You need to create an agent, specify a phone number and assign your agent to this number:

You can dial this number (902123561212) using following SIP servers:

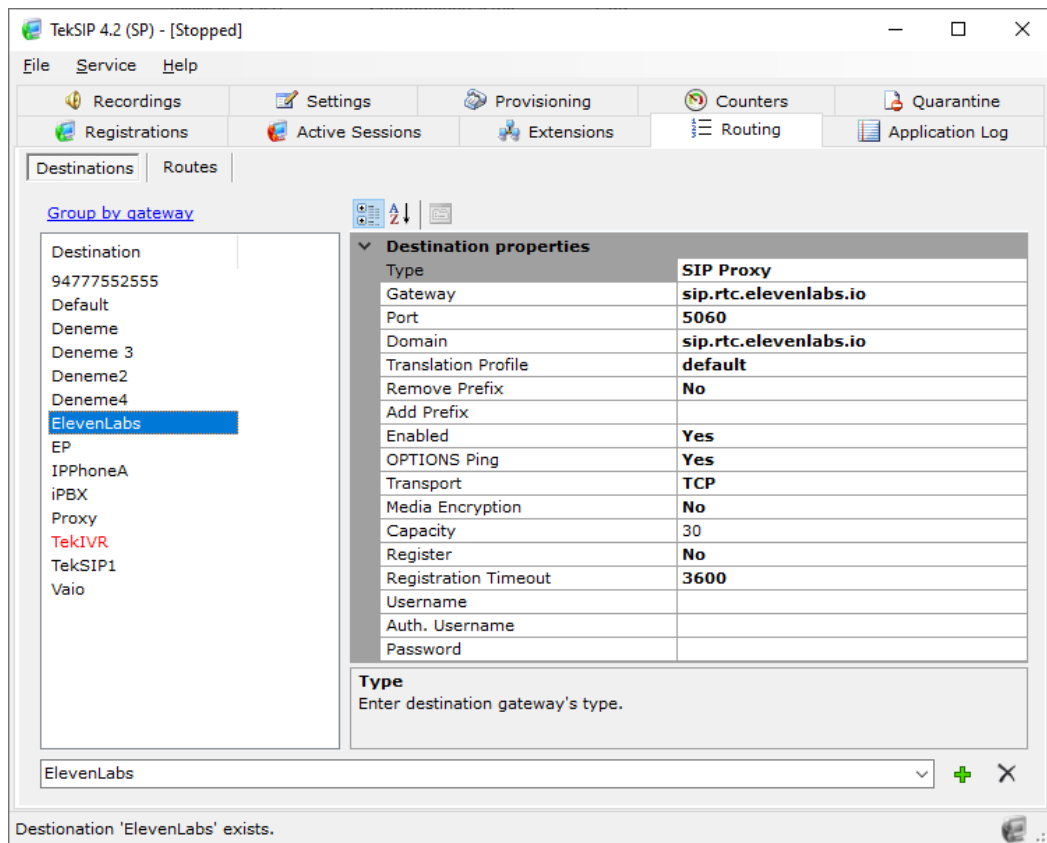

SIP Server TCP

sip:sip.rtc.elevenlabs.io:5060;transport=tcp

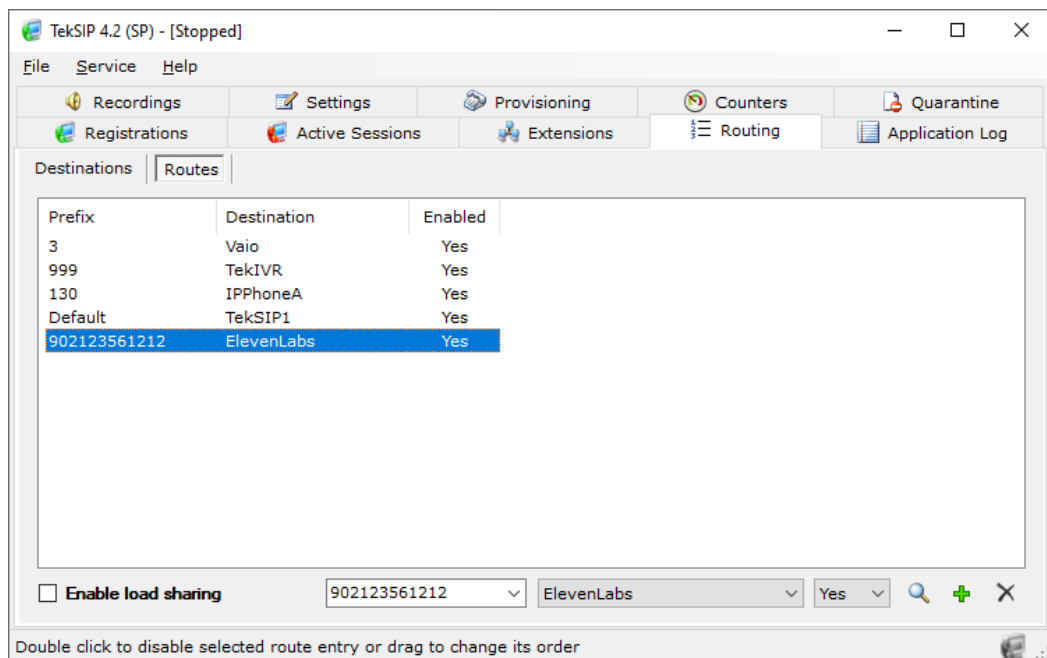

SIP Server TLS

sip:sip.rtc.elevenlabs.io:5061;transport=tls

Create a SIP destination and a route for the destination in TekSIP

[sip:sip.rtc.elevenlabs.io:5060;transport=tcp](tel:sip:sip.rtc.elevenlabs.io:5060;transport=tcp) is being used the example above.

Phone number 902123561212 is assigned for this agent. TekSIP will forward calls to the number 902123561212 through [sip:sip.rtc.elevenlabs.io:5060;transport=tcp](tel:sip:sip.rtc.elevenlabs.io:5060;transport=tcp)
